

Économie de la construction

By Carlos, Franck

Condition: New. Publisher/Verlag: Éditions universitaires européennes | Préface de Henri Atchou DOUTETIEN | Que peuvent apporter les Sciences Économiques au Génie Civil ? L'auteur cherche à montrer que les disciplines sont liées et entrent dans une parfaite symbiose de réponses à une perpétuelle interrogation et quête de savoir. D'ailleurs les outils proposés ne se limitent pas aux théories économiques. A partir de la Recherche Opérationnelle, les mathématiques, la gestion, une corrélation se crée en vue de poser les premiers éléments d'une optimisation financière et stratégique des chantiers. Cet ouvrage cherche à combler ce vide qui, longtemps, laissait croire à une absence totale de lien entre les deux disciplines. Un ouvrage accessible à tous notamment les comptables des entreprises de BTP tout comme les métteurs et ingénieurs en Génie Civil. A partir de plusieurs exemples, l'auteur montre l'interdisciplinarité qui gravite autour du monde de la construction et qui confirme la complexité d'approche du Génie Civil. Mais dans cette complexité à priori, les sciences économiques, dans une méthodologie rationnelle, montrent qu'il existe une démarche cohérente susceptible de rendre plus performant l'ordre des choses. | Format: Paperback | Language/Sprache: fre | 216 pp.
