Excerpt from *A Selected Bibliography on Special Districts and Authorities in the United States, Annotated* The explosive expansion of our cities and mushrooming growth of megalopolis and suburbia into previously rural areas have brought about newer and more extensive uses of the district device. With its ability to transcend city, county, and even State boundaries, the special district and its brother, the authority, have been utilized to solve increasingly large and complex problems of our urban, suburban, and rural populations. Air and water pollution control, hydroelectric and water storage dams, interstate highway construction and port management, and area economic development are a few examples of the use of this farmers organization to affect the lives of all Americans. In the last census of governments, special districts and authorities constituted the largest and fastest growing types of local governmental units in the United States. They are the prime agencies of our Federal Government and our State governments for the conservation and development of our national resources. And they are the most important agencies, along with counties perhaps, for providing urban levels of services to the increasing population outside of municipal boundaries. Yet, despite these increasingly important functions, relatively little is known about them. As late as 10 years ago, John Bollens referred to Special districts as the new dark continent of American politics, a statement that many researchers have found worthy of quoting since.
