Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Developing Inquiry for Learning shows how university tutors can help students to improve their abilities to learn and to become professional inquirers. An increasing proportion of students entering higher education seem to assume that learning is a relatively passive process. This may be the largest single limitation on their achievement. University tutors need to be able to respond creatively to students learning needs and difficulties. The modern teaching environment in higher education demands a sophisticated approach to teaching, learning and assessment i.e. the curriculum: its planning, its development and tutors professional development. Tutors need fresh ideas about how to challenge students spoon-fed approach, to enable them to become collaborative, yet independently motivated learners. In the innovative and practically proven approach developed by the authors of this book, students are guided to implement action research into their learning practices and reflections. Each student s cumulative set of patches, together with their regular reflective writing, provide the basis for assembling a composite final assignment, a Patchwork Text , for assessment. This style of curriculum and assessment organisation encourages regular peer feedback and formative assessment, as part of the whole module process. This is a dynamic approach which builds personal confidence within students, both as learners and as professionals. Providing teaching materials and examples of students responses, including the use of blogs, wikis and discussion boards, Developing Inquiry for Learning analyses and theorises on the deeper characteristics of the difficulties being addressed. With the provision of relevant frameworks of theory and values, readers are amply...
