Taylor Francis Ltd, United Kingdom, 2009. Paperback. Condition: New. New.. Language: English . Brand New Book. The special issue aims at providing a forum for empirical and theoretical research on the integration of perceptual and motor processes in the human mind. Integrative approaches to perception and action have proved fruitful in several areas, including large-scale questions pertaining to the functional architecture of the mind. The papers collected in this issue consist of four reviews and nine reports of original research, approaching the integration of perception and action from a broad cognitive-neuropsychological perspective and using a variety of techniques from the study of deficits in brain-damaged patients, to electrophysiology, imaging data, kinematic and postural measures, and mental chronometry.
