

## Painlevé III: A Case Study in the Geometry of Meromorphic Connections

Filesize: 7.87 MB

### Reviews

*Very helpful to all category of individuals. It is definitely simplified but surprises inside the 50 percent of your pdf. I am very happy to inform you that this is actually the very best pdf i have read in my very own lifestyle and may be the finest pdf for actually.*  
*(Christelle Treutel)*

Springer-Verlag GmbH Okt 2017, 2017. Buch. Condition: Neu. Neuware - The purpose of this monograph is two-fold: it introduces a conceptual language for the geometrical objects underlying Painlevé equations, and it offers new results on a particular Painlevé III equation of type PIII (D6), called PIII (0, 0, 4, -4), describing its relation to isomonodromic families of vector bundles on P1 with meromorphic connections. This equation is equivalent to the radial sine (or sinh) Gordon equation and, as such, it appears widely in geometry and physics. It is used here as a very concrete and classical illustration of the modern theory of vector bundles with meromorphic connections. Complex multi-valued solutions on C are the natural context for most of the monograph, but in the last four chapters real solutions on R0 (with or without singularities) are addressed. These provide examples of variations of TERP structures, which are related to tt geometry and harmonic bundles. As an application, a new global picture is given. 204 pp. Englisch.
