

## Recreating Tooth Biology: The Biomimetic Way

By Dudeja, Chetna / Taneja, Sonali

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Any alteration or loss of tooth structure should be replaced with materials which are similar to the natural tooth structure in terms of strength, biology, function and esthetics. Biomimetic materials are the materials based on natural processes that artificially replace biologic elements in order to recreate optimal oral health. By utilizing biomimetic therapeutic approaches, dentists can improve and become closer to natural biological structures and their function. This book provides an insight of different biomimetic restorative materials and procedures and their application in the field of conservative dentistry and endodontics. | Format: Paperback | Language/Sprache: english | 188 pp.

### Reviews

*Without doubt, this is actually the best job by any publisher. It is written in basic phrases instead of difficult to understand. You will like the way the author publishes this publication.*

-- **Dr. Marvin Deckow**

*Great eBook and beneficial one. Yes, it is actually play, nevertheless an amazing and interesting literature. I found out this book from my i and dad recommended this ebook to understand.*
