Hamilton Science Of Moral Life. (1) Science. Exact, complete and systematic knowledge and laws of any department of existence. Science is not any more true than ordinary knowledge. (2) Life. This word has not a distinct meaning in modern languages. We might define: Life, the possession and exercise of a certain kind or class of powers. We divide life into - a) Organic and(6) Psychical. The Organic again divides into animal and vegetable life. Thus we have three ideas under the one word. The Greeks had three words: Latin, vita, life of man, his rational life. applied to animal life, corporeal. (plant,) life of a plant. Latin, fui; English, to be. These three kinds of life were granted three words in ancient languages, but not in our English tongue. There is a community of nature between vegetable and animal life, but psychical life differs from both. (3) Moral Life. Man s life as rational, may be considered in different ways. We speak of his individual, social, political, domestic and religious life. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
